

BRO-FISH

YOUR BIOLOGICALLY INSPIRED "SWIMMING ROBOT"

"INTELLIGENT TOYS,
INTELLIGENT KIDS"

PRODUCT DEFINITION

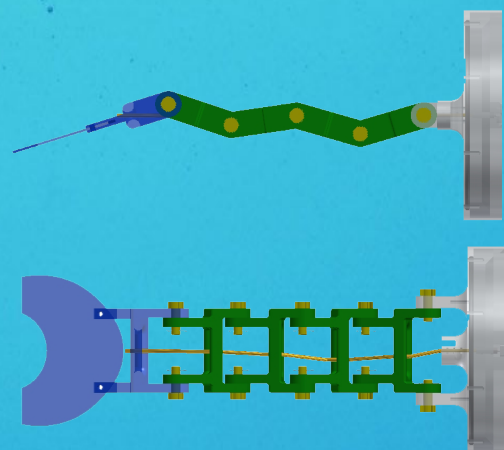

The "Swimming Robot" is an educational construction kit for eight to twelve years old children.

Features are the following:

- Waterproof body
- Generation of forward propulsion
- Steering in the horizontal level

TAIL MECHANISM

The newly developed tail mechanism is the key concept. The tail consists of 5 structurally identical segments connected with bolts. In the middle of each segment there is a hole with a 2 mm shaft that rotates continuously.
